

AN INDEPENDENT PAPER  
FOR THE HOME

## JOCK'S WAGGIN' TONGUE

Vol. 3 Thurs. May 4 1938. No. 11  
Jock McIntyre, Editor

We know a lot of people in this community who think of McIntyre & Co. whenever they think of Hardware and we are glad they do.

Mrs. E. Matlock is back from Nova Scotia and reports a fine trip down East and back.

Oh, Boy 1 Oh, Boy! what a special! and at the right time too, Kelowna (while only) at 10 cents per pound for your spring clean up.

Fred Alder says this is home again now having sold his B.C. farm. He must like it.

Have you your fishing equipment? The season opens on the 15th you know and we have a full assortment of your requirements.

Yes, don't mess around at doing things when he decides the time to do them. We saw him out on the golf course in the last Saturday evening and he was in his element and a shot gun looking for golfers.

A grease gun that will shoot grease through writing paper at five paces. A pump sprayer with a 25 foot hose and 25 pounds of grease free. That's our gun deal.

The modernists say, "There ain't no hell." The fundamentalists say, "The hell there ain't!"

In used cars we have a real buy in a 1938 Chevrolet. It looks, acts and runs like new. It's just out of the shop after being completely overhauled and at a price that will surprise you.

Mrs. Bert McGavin is a Veteran hospital patient and doing nicely so we hear.

Let us tell you about the new Westinghouse refrigerator that this year gives you the ultimate in the low cost, as well as lower operating costs plus perfect food protection.

If you could have seen all of the teen age flippers that were at the O.O.R.P. party Sunday night you would have thought that the sixth grade had just descended at a girls school. Man alive are we men getting old.

The spring paint sale is still on and we are pleased to be able to make these savings for you.

## LOCAL PAPER TO GO HOME PRINT

### Co-operation Of Merchants And Public Sought

As promised when the present publisher purchased this paper, progressive changes are being made in The Chronicle.

Recently a machine for the casting of slabs was installed and now the announcement is made that all the paper will be printed here commencing with the May 18th issue.

This means that your local paper, for the first time since its founding will be printed without outside assistance.

Increasing the cost of production, with greater labor and many other factors entering into the change, the publisher is entering out on a venture in which he must have the full hearted co-operation of merchants and the residents of the area which the paper serves. Copy for advertisements and news items must be in the office earlier than they have in the past, but on the other hand a greater selection of space for advertisement will be available as well as making possible room for more local news.

This is your newspaper, so readers are asked to lend a hand in the effort to make it an instrument for community building.

## MAIN STREET

Mrs. Harry Smith has been appointed agent for the Marquis Flower-shop Lethbridge. Orders given Mrs. Smith will receive prompt and efficient attention.

K. R. McLean, Optometrist and Optician, 208 and 210 Scotchman Bldg., Calgary will be in Carmangey at the Drug Store Tuesday morning May 9th and in Champion at the Drug Store Tuesday afternoon.

R. Latiff has accepted a position on the staff of the Poncha Mental Hospital. He left for his new position with the best wishes of local young people on Saturday.

It was that versatile and brilliant genius of the early American days, Benjamin Franklin who first contrived bifocal glasses to save himself the trouble and inconvenience of changing from one pair to another. Such a busy person as he was, again found it necessary to be the mother of invention, so he devised a pair of spectacles with the upper half holding his distance lenses and the lower section his reading glasses. They were crude, but they functioned on all occasions from that time on. Many improvements have been made since.

C. Jessup, editor of The Nanterre News was a visitor at The Chronicle office on Saturday.

Mrs. E. Latiff spent the first of the week at Staveland owing to the sudden death of her brother.

Mrs. Geo. Rhodes has her guest Mrs. Nash of Fernie, B.C.

## S. C. WOMEN ENTHUSIASTIC

A largely attended meeting of the Champion branch Women's Social Credit group was held at the home of Mrs. Patterson on Tuesday, presided over by Mrs. Chamberlain. Mrs. Root, the special speaker for the occasion gave a comprehensive report of the benefits of Social Credit to the people of the province. As a test of the enthusiasm of the group it was asked whether the group should disband or carry on and the vote was unanimous to carry on. Lunch was served.

### Main Street Continued

In the current issue of The Canadian Weekly Newspaper Association's Bulletin mention is made of special columns which have become synonymous with the paper, and fourth in the list for all of Canada is "Jock's Waggin' Tongue".

Canon Winter spent Monday attending a conference of the clergy at McLeod.

Help the high school students with their draw for a ticket to Calgary to see the King and Queen. The pretty girls have made fast work of ticket-selling so far but more sales are still required.

Mrs. Gottenberg had as her guest on Tuesday Mr. and Mrs. A. McCullough of Calgary.

Miss Marjorie McCullough and Miss Katherine Gottenberg, returned from University of Alberta in the district Miss M. McCullough will go to Calgary then to Vancouver to assume her duties at the hospital.

## Co-operation Promises Of Liberals kept

### Provincial Leader Issues Statement—Interesting Local Situation

In a statement last week-end E. L. Gray, provincial leader of the Liberal party said that Liberals would co-operate with any party or group, wanting decent, soundly progressive government and to that end Liberals will be organized in every riding in the province so that the best possible candidates may be selected. The aim will be to secure as nearly as possible a candidate to represent a true cross section of the country, not one particular group or party and every effort will be made by the Liberal organization to see to it that such candidates are placed in the field. Where it is the general opinion that the candidate does not represent a majority opinion then steps will be taken to enter one who does. Mr. Gray stated he did not favor the creation of new parties as they could not represent a cross section of the public opinion any better or as good as the existing parties.

Mr. Gray recognized that there was a great diversity of opinion among the people of Alberta. In pointing out that in the five provincial elections held since 1926, three Liberals had been elected, not as Unity candidates but under Liberal tickets with the backing of the Conservative party, the Unity party not existing at that time but organized several weeks after the contest.

Information gathered by The Chronicle to the effect that the Liberal-Federal constituency will meet shortly and decide on a line of action in the provincial field. In this riding the output of the co-operation to be given the Liberals in the Federal field, it is stated may have a bearing upon what will be done in the provincial, the output of co-operation being put to a final test. It is stated by one or two prominent Liberals of the constituency interviewed that the Unity and Conservative party have a real opportunity to indicate their willingness to co-operate by pledging support to the Liberal-Federal candidate already in the field. Such action on their part would, it is asserted, show their true idea of united campaign.

With all this talk by Liberals and Unity Associations the Social Credit groups continue quietly, but surely, to consolidate their position. It is intimated that there will be no election this year, thus the benefits of the act passed will have time to bear fruit.

IF there were  
no  
Life Insurance

IF there were no life insurance, millions of Canadian citizens would dread the future. Many men would be powerless to protect their loved ones. Thousands more families would be "on relief."

Fortunately there is life insurance—and Canadian families can face the future unafraid. Through their savings in life insurance, men and women (1) guarantee financial security for their families; (2) provide funds for educating their children; (3) protect their own old age.

Each and every working day, policyholders and their beneficiaries in Canada receive more than Five Hundred Thousand Dollars from their life insurance savings.

### Peril On The Highways

A careful analysis of the causes of accidents to motorists in the United States in 1938 places the responsibility for the great bulk of the deaths and injuries from this cause squarely on the driver. Since conditions and human nature in this country are approximately the same, undoubtedly, were the facts available, a similar indictment could be laid at the door of the man behind the wheel for most of the accidents which occurred in Canada last year.

Since there is nothing to warrant an assumption that motorists are going to abandon careless habits with the opening of the 1939 season of slaughter on the highways in this country, it is a reasonably safe bet that before the end of this year several hundred new tombstones will have been erected in Canadian cemeteries as monuments to human error on the road and thousands will carry new scars, bruises and internal injuries as painful reminders of human fallibility behind the wheel.

As may have been inferred at the outset, the analysis shows that comparatively few of the 32,000 deaths and more than a million injuries sustained by Americans on the roads in 1938 are attributable to defects of mechanical equipment or to faulty atmospheric or road conditions, leaving the blame entirely on the motorist for the great majority of this enormous toll.

#### Causes Of Accidents

Last year, rather than more than 37,000 motor vehicles were involved in 29,000 fatal accidents on the roads in the United States. Investigation showed that over 34,000 of these cars and trucks were apparently in good mechanical condition, which means that less than 3,000 were faulty on account of poor brakes, defective steering mechanisms, glaring headlights or other weaknesses in the motor vehicle itself. If this analysis is correct, 92 per cent. of the accidents cannot be charged up against poor or defective equipment.

Neither can bad weather be indicted for more than 16 per cent. of the accidents, for approximately 25,000 crashes occurred in clear weather with fog, sleet, snow or rain entirely absent.

Further, even slippery or treacherous roads caused by precipitation in the form of snow, ice or rain cannot be held blameworthy for more than one-fourth of last year's fatal accidents. In other words, nearly 22,500 of these disasters happened on roads that were perfectly dry at the time.

#### The Driver To Blame

After allowing for the fact that some of the crashes were undoubtedly caused by a combination of two or more of the causes outlined it can be seen, by a process of elimination, that considerably more than half the deaths and injuries on the highways in 1938 were due to some quirk of human nature on the part of the drivers—carelessness, ignorance, miscalculation or even downright criminal recklessness.

It is illuminating to note that out of the 29,000 fatal traffic accidents, approximately 21,000 are attributed to aberration or worse on the part of the driver, approximately 8,500 are about 20 per cent. were caused by excessive speed by drivers who paid no attention to legal speed limits and it is further important, in discussing the trend of the times, to observe that this inclination to travel too fast for safety has been on an upward curve for several years.

Of the balance of 12,500 deaths chargeable directly against the motorist handling the wheel, over 3,350 were caused by reckless driving, approximately 2,750 resulted from the use of the wrong side of the road, and the same number were caused by drivers going without the right of way and the balance are credited to such dangerous practices as cutting in too soon head of the car just passed, passing other cars on hills and curves where visibility should be curtailed, passing other cars on the wrong side and other violations of commonsense traffic rules.

#### The Drunken Driver

Just how much of this enormous death and injury toll can be charged up against drunken drivers is purely a matter of speculation, but, unfortunately there are reasons for believing that there were many more than were directly assigned to this cause and that the number runs into the thousands.

One further lesson is to be gained from a perusal of the 1938 American highway accident statistics and that is the fact that the death and injury toll was nearly twice as great on Saturdays and Sundays than on other days of the week, doubtless due the inevitable increase in weekend traffic, especially in and near the larger centers of population, augmented undoubtedly by the care-free spirit of holiday crowds, coupled with the likelihood of a larger percentage inebriated to a greater or less degree.

#### Reform From Within

If this greater slaughter of the guilty and innocent alike is going to continue and to increase the time is going to come when it will deter many from seeking the pleasures of the open road.

What is going to be done about it? Strict regulations and their rigid enforcement undoubtedly will have a beneficial effect, but it would appear that the only way to be improved and the highways rendered reasonably safe drivers must exercise more restraint and greater care. The reformation must come from within. That seems to be the most potent solution of a very serious problem.

#### Awarded Scholarships

James Colclough of Victoria, and Kenneth McCullum of Seattle, who participated in awards to Canadian students by Columbia University for 1939-40. Colclough, student at the University of British Columbia, was awarded a resident scholarship in political science, and McCullum, a resident scholarship in political science. The scholarships are valued at \$500 each.

#### Designed First Hydroplane

Dr. Francis Alexander Barton, 78, designer of Britain's first airship and the world's first hydroplane, died in 1902. Dr. Barton crossed the English channel in a balloon, the first man to do so, to produce the coronation of King Edward VII.

A better taste is given to salt by the presence of magnesium sulphate.

A man is like a tack. He can only go as far as his head will let him.

### Crops On Arid Lands

Dry Farming Is Practiced Where Annual Rainfall Is Light

Dry farming is the raising of crops on arid or semi-arid lands without irrigation. It consists of crop rotation, tilling in such manner as to make use of all available moisture, and raising drought-resistant plants. Dry farming is usually practiced where the annual rainfall is less than 20 inches, a condition which makes special methods of moisture conservation necessary. Irrigation, or the artificial application of water to the land, is not part of dry farming.

Dry farming has probably been practiced ever since the dawn of civilization in semi-arid regions of dry continent in the world," says a bulletin from the United States Department of Agriculture. "Modern dry farming is simply applying modern scientific methods and implements to the ancient problem of coaxing nature into producing large quantities of plants suitable for human food in semi-arid regions where natural conditions only relatively small quantities of crops can be raised. The few animals are produced. Conservation of the scanty rainfall for producing crops is the object sought. Crop rotation, tillage methods and the adaptation of crop plants to semi-arid conditions are the means employed."

### Bears Most Of Revenue

Canada Derives Large Sum From Income Tax Payments

Income tax payments furnished the largest single item of government revenues during the last fiscal year, it was revealed in Finance Minister Dunning's budget speech.

The total was \$142,025,000, the highest ever reported and an increase of 18 per cent. over the previous year. Of this total \$85,185,000 was from the tax on income, \$46,937,000 from individual incomes and \$9,903,000 from the five per cent. tax on interest and dividends.

Second largest producer was the sales tax, which amounted to \$119,400,000, a decrease of \$18,500,000 compared with the previous year. Other excise taxes produced \$42,240,000, a decrease of \$23,440,000. Excise duties, mainly on liquor and tobacco, remained practically unchanged at \$51,313,000.

Custom duties yielded an estimated \$78,750,000, a decrease of \$14,700,000.

### Canada's Oil Production

Domestic Stands Fourth In Empire With Trinidad Having Lead

Canada, today stands fourth in production of oil in the British Empire. The development of the Alberta fields has been particularly significant, for this fuel is of vital need to the Commonwealth.

The largest Empire producer, however, is still Trinidad, which is supplying 17,757,325 barrels, or 35.4 per cent. of the entire Empire output.

Bahrein Island, in the Persian gulf, came second with about 8,500,000 barrels, or 16.9 per cent. of the total. Burma added 7,557,000 barrels, or 15 per cent.

The Dominion's contribution was 6,944,039 barrels, or 12.8 per cent. Alberta, which, in 1938, was still to pass the 1931 record of 1,455,195, has come up to the 6,000,000-barrel mark. Ontario last year added 168,000 barrels. New Brunswick 24,000 barrels and the Northwest Territories 10,000 barrels.

### New Vitamin Treatment

Scientists Cope With Fabled Type Of Fatal Neuritis

Three California scientists reported discovery of a new vitamin treatment of an excruciatingly painful type of fatal neuritis.

H. B. Bock, M. Y. Kromers and C. G. Wiggins, of the California Institute of Technology, presented results of their experiments in report to the National Academy of Sciences. The report offered hope of a strikingly effective remedy for a disease, usually called tic douloureux, without resort to surgery.

The "douloureux" produces periodic contractions of the facial muscles as the pain, as sharp as that of a dentist's drill striking a nerve, occurs.

The California team found that large injections of vitamin B1—the yeast vitamin—were effective in relieving it.

#### Idea About Fogs

London fogs may not be composed basically of dust particles, as is the common belief, suggests Professor R. Whiddington, Leeds University. He says the fog bases are salt and sulphuric acid.

Carrot seeds are so minute that 257,000 are required to weigh one pound.

### Passes Experimental Stage

Farming Without Soil Now Being Taken Up Seriously

So far soil-less farming has been carried out largely on an experimental scale, but recently the passengers and crew of a trans-Pacific clipper plane dined on Wake Island on vegetables produced in ten days from trays planted with soil.

These trays yielded 33 pounds of tomatoes, 20 pounds of lettuce, 20 pounds of string beans, 15 pounds of squash and 44 pounds of peas. The diners declared that the vegetables tasted every bit as good as those grown in soil.

Wake Island should make an ideal base for hydroponic farming (soil-less farming is technically called), for although it has no soil it possesses a glorious tropical climate. An experimental station is being established there, where farming in tanks will be taken seriously.—London Times.

### In Too Solid Stone

Floor Map In Washington Is Sdly Out Of Date

The story the floor map in the Post Office Department Building in Washington is one to bring tears of sympathy from a mapmaker. A few years ago, when the \$20,000 map of the world was worked out in various colors of stone, the world itself was in a fairly serene and peaceful state. The mapmakers seemed assured and countries seemed established. The embarrased guardians of the map have to explain to visitors why Austria and Ethiopia and Czechoslovakia and Albania are outlined in stone on the floor of the Post Office Department will have to grin and bear it.—New York Sun.

### Enjoys Visits To England

Chief Justice Duff Has Great Love For Old Land

A Canadian to the core of him, one of the characteristics of Chief Justice Duff in his love for England, is that it is not a love for the England of battle, nor the English of Mr. Kipling's barracks-room ballads; it is a passion rather for the England that has walked justly and loved mercy; for the England that has given to the world a Milton and a Shakespeare and to humanity more of justice and freedom. Each year, or as often as duty calls or permits, he makes a pilgrimage to the Old Land, and there the historic spots of the island, hallowed ground and places, know him as much as the courts of the King's justice.—Ottawa Journal.

### Old Chinese Custom

The Chinese have custom hot tea pots, forerunners of the modern thermos bottle, for hundreds of years. A porcelain teapot, enclosed within a heavily padded wickerware basket, is kept ready for the use of travellers.

A tire company says that more than 50 per cent. of a tire's wear comes in the four warmest months.

### SELECTED RECIPES

#### PAN-FRIED TOMATOES WITH SAUCE

3 shredded whole tomatoes  
6 firm medium tomatoes (1 1/2 lbs.)  
1/2 cup flour  
1 teaspoon salt  
Few grains pepper  
2 tablespoons butter  
2 cups medium white sauce  
Peel tomatoes and cut into halves, cut in half, dip each half in the flour, salt and pepper combined, and then in the butter. Fry in a hot oil until lightly browned and tender, turning once. Meanwhile heat the shredded whole tomatoes (which have been split and mixed with the remaining butter) in a moderate oven of 375 degrees F. for 10 min. Place the split tomatoes on a hot platter and top with the sauteed tomato halves. Cover with sauce and serve at once. Serves six.

#### JELLY CREAM LAYERS

(Three egg whites)  
2 cups sifted Swiss Down Cake Flour  
2 teaspoons Calumet Baking Powder  
1 teaspoon salt  
1 cup butter or other shortening  
5 cup sugar  
5 cup milk  
1 teaspoon vanilla  
3 egg whites, stiffly beaten  
1 cup currant jelly  
1 teaspoon vanilla  
2 tablespoons powdered sugar

1 cup cream, whipped  
Beat the cream, measure, add sifted powder and salt and beating three times. Measure, add sugar gradually, and cream together until light and fluffy. Add flour, alternately with milk, a small amount at a time, beating after each addition until smooth. Add vanilla. Fold in egg whites quickly and thoroughly. Bake in two greased 8-inch layer pans in moderate oven (375 degrees F.) 25 to 30 minutes. Cool. Split layers in half. To put cake together, spread currant jelly between split surfaces. Fold vanilla and sugar into whipped cream and spread between layers and on top of cake.

#### Bargain Money Avoided

Will Wynne, proprietor of a Raleigh, N.C., radio shop, held a sale. Along with ration he placed ten \$1 bills in his shop window. Attached to the bills was a sign reading, "Original price, \$1; sale price, 25 cents." Only three persons took advantage of the opportunity to buy a dollar for 25 cents, he said.

A world's record of the kind was made when an English steel plant turned out an ingot weighing 230 tons.

### After Eighty Years

History Of British Columbia Within Span Of Life-Time

New Westminster is observing the 80th anniversary of the arrival in British Columbia, of the Royal Engineers detachment which came on the Thames City. It is a remarkable fact that after so long a lapse, six of the party who arrived on that ship are still alive. They were all, of course, publicity than he used to be. Whereas, in the past, he has often dodged reporters in almost Garbo like manner, he is now prepared to let his voice be heard by the multitude. Recently he gave a wireless talk to the Empire.

His subject, naturally, concerned the work of the Bank of England. On his travels, Mr. Norman sometimes conceals his identity under the title of "Professor Clarence Slinner," and he seldom gives interviews.

### Seldom Gives Interviews

Governor Of Bank Of England Keeps In Background

"Mystery Man" of finance, Montagu Norman, Governor of the Bank of England, is apparently less shy of publicity than he used to be. Whereas, in the past, he has often dodged reporters in almost Garbo like manner, he is now prepared to let his voice be heard by the multitude. Recently he gave a wireless talk to the Empire. His subject, naturally, concerned the work of the Bank of England. On his travels, Mr. Norman sometimes conceals his identity under the title of "Professor Clarence Slinner," and he seldom gives interviews.

### The White Potato

When the Spaniards first introduced the white potato into Europe in the early 16th century, people were prejudiced against it, believing that it was the original fruit that Eve nibbled in the Garden of Eden.

To study automobile performance in wintry weather, the automobile engineer makes tests in a cold room that can be chilled down to 40 below.
